Summary

I am a computer vision scientist at Amazon Device AI (Lab126). I received my Ph.D. in computer science from the National University of Singapore in 2022, supervised by Prof. Roger Zimmermann and Prof. Jiashi Feng. My research interest is *learning structured representations of visual scenes* which include visual relationship detection, scene graph generation and video understanding. I have 5 years+ experience in computer vision and machine learning research and have been publishing in international, prestigious venues. I code in Python and PyTorch.

Experience

Jul. 2022 – Present **Computer Vision Applied Scientist**, *Amazon*, Taipei, Taiwan.
Researching and developing computer vision algorithms for intelligent devices at the Device AI team under Amazon Lab126.

Oct. 2020 – Jun. 2022 **Computer Vision Research Intern**, *TikTok*, Singapore.
Worked on i) unbiased scene graph generation via positive-unlabeled learning that achieves SOTA debiasing performance, ii) revealing the weakness of single-positive multi-label learning methods by adding real-world biases, and iii) improving smoking video detection by 10% at the Trust & Safety team.

Jun. 2020 – Oct. 2020 **Computer Vision Research Intern**, *ASUS Intelligent Cloud Services*, Singapore.
Worked on video human-object interaction (HOI) detection. Specifically, I introduced a new video HOI benchmark, *VidHOI* and proposed a spatial-temporal model *ST-HOI* which surpasses 2D/3D baselines.

Jul. 2013 – Jun. 2014 **Software Development Intern**, *Microsoft*, Taipei, Taiwan.
As a Microsoft Student Partner, I developed multiple Windows Apps, *e.g.*, *NHK Reader* with 7K+ downloads, and gave Microsoft Tech Talks on software development to Taiwan's college students.

Education

2017–2022 **Ph.D., Computer Science**, *National University of Singapore*, Singapore.
Supervised by Prof. Jiashi Feng and Prof. Roger Zimmermann. Worked on: Visual relationship detection, Scene graph generation, Human-object interaction recognition, Video (spatial-temporal) understanding

2012–2016 **B.Sc., Electrical and Computer Engineering**, *National Chiao Tung University (Currently National Yang Ming Chiao Tung University)*, Hsinchu, Taiwan.
Overall GPA: 3.89/4.30 (or 3.90/4.00). Took various computer science courses.

2014–2015 **Exchange Program, Information & Communication Engineering**, University of Tokyo, Japan.
Worked on efficient look-up table based SVM classifiers for image classification at the *Multimedia Processing Lab*, supervised by Prof. Toshihiko Yamasaki and Prof. Kiyoharu Aizawa.

Selected Projects

Affiliated with TikTok (ByteDance AI Lab) & National University of Singapore

2022 ***Improving Smoking Video Detection with new Architectures and Augmentations***.
We implemented SOTA data augmentation techniques including Mixup, Cutout and CutMix, and various new visual backbones such as Swin Transformer and we ended up **improving the smoking video detection performance by around 10 percent measured by recall**.

2021 ***Revealing the biases in Single-Positive Multi-Label Learning***.
We revealed that the current Single-Positive Multi-Label (SPML) methods do not consider labeling bias such as *bounded rationality* and *reporting bias*, and we showed that **adding theses real-world biases to the existing SPML models would undermine their performance**. [Slides]

2021 ***Unbiased Scene Graph Generation with Positive-Unlabeled Learning***.
We introduced *Dynamic Label Frequency Estimation* (DLFE) for debiasing scene graph generation (SGG). Applying DLFE to SGG methods we got **new SOTA debiasing performance**, specifically, **+5 averaged mean recall points (24%→29%) or +21 tail recall points (17%→38%)** than the previous SOTAs. [Paper] [Source Code] [Slides] [Poster] [Video]

Affiliated with ASUS Intelligent Cloud Services & National University of Singapore

2020 ***Human-Object Interaction Detection in Videos***.
We *introduced* a keyframe-centered, large-scale video human-object interaction detection benchmark named *VidHOI*. Proposed a strong baseline called *ST-HOI* **outperforming the 2D/3D baseline models by obtaining 74% relatively or 6.1% absolutely higher mAP (8.3%→14.4%)** on temporal-related HOIs. [Paper] [Source Code & Dataset] [Slides] [Video]

Affiliated with National University of Singapore

2020 ***Visual Relationship Detection with External Knowledge***.
We introduced a novel Transformer-based multi-modal visual relation detection architecture, named Relational Visual-Linguistic BERT (*RVL-BERT*), enriched by the visual-linguistic knowledge from large-scale external datasets. **RVL-BERT achieved SOTA performance** on the SpatialSense dataset and competitive results on the VRD and VG datasets. [Paper] [Source Code]

2019 ***Zero-Shot Indoor Localization with Floor Plans***.
We introduced a multi-view image-based indoor localization system named *GLN* achieving SOTA performance. Also proposed a zero-shot learning pipeline where we utilize the proposed *Map2Vec* location-aware embeddings. **Zero-shot GLN achieves promising results, *e.g.*, 56.3% 5-meter localization error.** [Paper] [Source Code] [Poster] [Video]

2018 ***Weakly-Labeled Audio Tagging with Attention-based Model***.
We introduced a multi-level attention-based audio tagging model making segment-level predictions with temporal modeling, followed by aggregations along both time and feature domains. **Our method achieves SOTA audio tagging results.** [Paper]

2017 ***Real-Time On-Device Blind Navigation***.
The Light navigates blind people to move around smoothly in real time using *MobileNet* for object segmentation. It **won 2nd prize** at *iNTUition Hackathon 2017*. [Project Page]

Affiliated with National Chiao Tung University

2016 ***Right Whale Idenditication with Fast R-CNN***.
We developed a right whale identification system face by training *Fast R-CNN* on a large-scale Kaggle dataset. [Technical Report] [Source Code]

Affiliated with Univeristy of Tokyo

2015 ***Fast Image Recognition with Look-Up Tabled-based Bag-of-Features***.
Table-Based Bag-of-Features (Table-Based BoF) is a fast look-up table based method for finding bag-of-features-based indexes of query pictures without feature extraction. [Paper] [Source Code]

Academic Services

2018–Present **Program Committee**, *NeurIPS Workshop on Distribution Shifts in Real-World Applications ('22/'21)*, *ACMMM'22 Open-Source Program*, *BigMM'20 Graduate Student Consortium*, *CVPR'18 Workshop on Visual Understanding of Humans in Crowd Scene*

2018–Present **Reviewer**, *ACMMM* ('22/'21/'20), *IEEE TMM* ('21), *IEEE TIP* ('20), *ACM TOMM* ('20), *Springer MMSJ* ('19), NUS MSCS Admission ('21/'20)

2017–2021 **Teaching Assistant**, Big-Data Analytics Technology (NUS, '21), Computer Vision and Pattern Recognition (NUS, '19/'18), Data Structures and Algorithms (NUS, '17), Special Friday Lecture for High School Students (UTokyo, '15)

Scholarships & Awards

2017 ***2nd Place***, *iNTUition Hackathon 2017*, a 24-hour hackathon at *Nanyang Technological University*.

2017 ***NUS Research Scholarship*** including full tuition waiver and monthly stipend, awarded by the *National University of Singapore*.

2015 ***Helm Technology Scholarship*** awarded by the *Helm Technology Inc.*, Taiwan.

2014 ***Student Exchange Support Program*** scholarship for exchange students to the *University of Tokyo*, awarded by *Japan Student Services Organization*.

2014 ***Short Term Exchange Scholarship*** for outbound exchange students, awarded by the *National Chiao Tung University*.

2014 ***Xiao Yuan-Long Scholarship*** for students with superb GPA, awarded by the *National Chiao Tung University*.

Skills

Programming &Frameworks: PyTorch, Python, Matlab, C, C++

Language: Mandarin Chinese (native speaker), English (fluent) and Japanese (fluent; JLPT N1)

Position of Responsibility

2013-2014 **Vice President**, *Chien-Kuo & Taipei First Girls' High School Alumni Association*, National Chiao Tung University.
I took on leadership roles to organize a variety of events for the two high schools' alumni.
